DELTA SONIC CAR WASH Oct 2013 - Present
Responsibilities include cleaning and performing additional services to the interior and exterior of a vehicle and ensure vehicles enter and exit the car wash safely

PERSONAL PROJECTS

Source code can be viewed on my Github

NBAREACT / NBAREACTWEB | JavaScript • React • React Native
- A responsive web and mobile application created for iOS and Android that allows for easy retrieval of information regrading NBA games
- Information presented to the user initially includes current games for a given date and current league standings
- Relevant information and stats for games, players, and teams are presented to user when navigated to the appropriate page
- Facebook's React Native framework allows this application to be developed for iOS and Android at the same time with minor adjustments

RNSTOCKS | JavaScript • React Native

- A mobile application that presents user with information regarding the current state of the stock market and the ability to search for a company or ticker symbol
- Features include current prices and changes for given stock and proper color change depending if a stock has a positive or negative gain

COLORCONVERT | JavaScript • HTML • CSS
- A web app that easily changes a hex color value to its rgb values or rgb to hex

TERMSCORES | Python
- A command line program that allows for easy retrieval of sport scores
- Scores can be retrieved for several sports and allow for lookup of previous scores from any point in the season
- User can also look up future matchups for a given date for the current season

MY WEBSITE | HTML • CSS • JavaScript • BootStrap
- Personal website devoted as a place to show my personal projects and photography
- Utilizes BootStrap for a completely responsive webpage
